NZ Duct + Flex are leaders in Dust and Fume Extraction solutions in a wide range of industries. Sourcing products only from major European suppliers, the wide product range (mostly ex stock) allows the company to improve workplace performance efficiently and cost effectively. With over 500 systems installed in Australasia, the company works to provide a correctly specified system so the working environment is protected to the same levels in 10 years, as the day the system was installed.

HSI Donesafe is an easy-to-use HSEQ software platform designed for safety, compliance, and risk management. Trusted by over 2,000 organisations globally, Donesafe offers 60+ customisable modules. Recognised as a Verdantix Green Quadrant 2025 EHS Software Leader, it helps streamline processes and improve outcomes, without the need for technical support.

Hill Labs is New Zealand's largest privately owned analytical testing laboratory, leading the way in analytical testing for over 40 years. Our dedication to occupational health and safety is reflected in the precision and integrity of the tests we perform, ensuring that businesses across New Zealand meet regulatory standards and safeguard their employees' wellbeing. With six labs nationwide we use the latest technology, enabling our team of expert technicians to deliver accurate, timely results that empower businesses to make informed, data-driven decisions.

BRONZE SPONSORS
